EXPERIENCE

Indeed

2021 – Present

Lead UX Designer, Design System (2023 – Present)

Led design for the Indeed Design System (Lunchbox)

- Set the team's annual strategic vision and roadmap
- Restructured the system into layered design tokens, enabling improved consistency and theming, and powered a theme test resulting in an estimated \$18MM increase in annual revenue
- Collaborated across four design system sub-teams (web, mobile apps, email, and documentation website) ensuring cohesion across product and teams
- Co-created design system MCP and AI Skills to enable designers and devs to use AI effectively

Senior UX Designer, Design System (2021 – 2023)

Experience design for the Indeed Design System

- Updated and maintained Figma libraries for over 100 product teams across a 200+ UX org
- Coordinated typography shift to Indeed Sans, resulting in \$12MM increase in annual revenue
- Created components, icons, and documentation in collaboration with engineering
- Promoted education and adoption of the system through classes, design reviews, and support

Blizzard Entertainment

2017 – 2021

Lead UX Designer (2020 – 2021)

Led design for company home page, Blizzard.com, and event site, BlizzCon.com

- Rebuilt several legacy pages to be fully responsive and WCAG accessible
- Created a new design system with Figma and Storybook to promote consistency
- Transitioned BlizzCon.com to fully support a virtual event due to COVID-19, resulting in 1.5 million max concurrent viewers

Senior Mobile UX Designer (2017 – 2020)

Mobile experience design for multiple applications

- Created new mobile app, Blizzard Esports, to support company goal of increased engagement
- Redesigned primary mobile app, Battle.net Mobile, to better support brand and accessibility
- Supported a variety of other Blizzard mobile apps as needed by the business

uShip

2016 – 2017

Senior Mobile UX Designer (2016 – 2017)

Mobile experience design for uShip mobile apps

- Completed rebranding and redesign of the iOS and Android apps, increasing transactions
- Redesigned navigation, user onboarding, and education
- Completed Drive4Schenker driver app for international partner, supporting \$25MM investment

Lead Mobile UX Designer (2015 – 2016)

Led mobile app experience design for 4 apps

- Designed similar experiences for multiple mobile applications, such as a family of app icons or introducing Touch ID, to deliver a group of consistent mobile apps
- Completed a redesign of the primary mobile app, MyHumana, increasing user ratings
- Collaborated with and mentored many UX designers across all mobile projects

Mobile UX Designer (2014 – 2015)

Mobile experience design for the HumanaVitality health and wellness mobile app

- Created sketches, prototypes, and high-fidelity comps for iOS and Android
- Facilitated weekly user research and usability testing
- Completed internal-agency UX training delivered by Pivotal Labs

UX Designer (2011 – 2014)

Experience design for an internal clinical system and an enterprise process team

- Implemented standard prototyping and usability testing processes across development teams
- Trained teams on UX processes via live sessions and video recordings
- Worked with teams on several development methodologies: Waterfall, Scrum, Kanban, and XP
